

mini
BIOMAN
2019

NBC2s miniBIOMAN Conferences are designed for two- or four-year college faculty and focus on a specific area of biomanufacturing. The three-day events provide in-depth knowledge of and experience in cutting-edge biomanufacturing technologies. Each conference includes SOP driven hands-on lab activities, informative lectures and a tour of a local facility. At the conclusion of the conference, participants will have a comprehensive, ready-to-insert curriculum module to utilize in their own programs.

Upcoming miniBIOMAN Conferences in Summer 2019:

Design of Experiments for Biomanufacturing

Mike Fino, Dean of Math and Science

Dr. Barbara Juncosa

Location: MiraCosta College
Oceanside, CA

**Quality Control and Quality Assurance
in Biomanufacturing**

Dr. Maggie Bryans and Dr. Linda Rehfuss

Location: Montgomery County Community College
Blue Bell, PA
