Kodak IBI Biolyzer Operation SOP

Approvals:				
Preparer:	Deb Audino	Date	03Apr08	
Reviewer:	Bob O"Brien	Date	03Apr08	

1. Purpose:

1.1. Operation of the Kodak IBI Biolyzer Rapid Analysis.

2. Scope:

2.1. Applies to the operation of the Kodak IBI Biolyzer Rapid Analysis System to track vital analyte consumption/production of living organisms.

3. Responsibilities:

- 3.1. It is the responsibility of the course instructor/lab assistant to ensure that the SOP is performed as described and to update the procedure when necessary.
- 3.2.It is the responsibility of the students/technicians to follow the SOP as described and to inform the instructor about any deviations or problems that may occur while performing the procedure.

4. References:

- 4.1. Kodak IBI Biolyzer Manual.
- 4.2. Kodak EKTACHEM DT pipette SOP.

5. Definitions:

5.1. Analyte: chemical/substance being measured.

6. Precautions:

6.1. Do not open spotting locator cover or the unit will have to reboot and warm-up again.

7. Materials:

- 7.1. Vitros slides from the -20°C freezer.
- 7.2. Kodak EKTACHEM DT pipette
- 7.3. Kodak EKTACHEM DT pipette tips.
- 7.4. charge cord for pipette.

8. Procedure:

- 8.1. Instrument Preparation
 - 8.1.1. Turn on the instrument. Allow the instrument to warm up for 15-20 minutes prior to using.
 - 8.1.2.Plug in the charge cord to the Kodak pipettor. Make sure red plug shows in the window. If not, then depress the black-square button until it does.
 - 8.1.3.Remove the test slides from the freezer and/or refrigerator. Allow them to reach room temperature before using (15-30 minutes).

8.2. Maintenance

8.2.1.Perform daily maintenance prior to using the instrument by emptying the slide disposal box on the right rear of the unit and checking the paper level.

8.3. Sample testing

- 8.3.1.Enter the date in the Biolyzer by the following steps:
 - 8.3.1.1. Press the SHIFT then the SERVICE key.
 - 8.3.1.2. At the OPTION prompt, type "17" then ENTER.

Kodak IBI Biolyzer Operation SOP

- 8.3.1.3. Enter date as MM-DD-YY, then ENTER. NOTE: this will return you to the OPTION prompt.
- 8.3.1.4. Exit out of service mode by pressing the SHIFT then the SERVICE key.
- 8.3.2.Remove the slide to be tested from the foil package. NOTE: slides must be used within 15 minutes of opening a package.
- 8.3.3.Place the slide on the slide track, line up slide as shown on slide lever.

 Manually push the slide advance lever to move the slide into the spotting position. NOTE: console should read: "spot slide with fluid."
- 8.3.4.Enter ID of specimen (if necessary) by pressing SAMPLE ID key and enter sample name/number. If no ID is necessary the machine will automatically assign it a numerical number (ie. 1,2,3, etc.)
- 8.3.5.Using the Kodak EKTACHEM DT pipette, remove 10 μ l of the test sample. Refer to the Kodak EKTACHEM DT pipette SOP for proper use.
- 8.3.6.Insert the pipette tip into the spotting locator (hole above slide) ensuring pipette is properly seated and dispense the sample. NOTE: The console should read: "Wait- slide being loaded."
- 8.3.7. Wait for the console to read: "Ready." Remove the pipettor from the locator and discard the pipette tip. Repeat steps 8.3.2 8.3.6 for each analyte to be tested. NOTE: slides will advance into slide disposal box.
- 8.4. Interpretation
 - 8.4.1. The values will print shortly after procedure is completed
- 9. Attachments: N/A

10. History:

Name	Date	Amendment
Sonia Wallman	1997	Initial release
Zach Bodah	18Feb05	Updated to 2005 SOP format
Deb Audino	04 Apr08	College name change
